Solve all equations.

1. $x - (-12) = -9$

2. $\dfrac{-3x}{5} = 6$

3. $-3c + 2 = -9$

4. $\dfrac{w - 9}{-4} = -2$

5. $\dfrac{2}{3}c + 12 = -18$

6. $\dfrac{5}{2}w + \dfrac{1}{3} = -\dfrac{4}{3}$
7. $2(c - 3) - 4(c - 5) = -2$

8. Translate into an equation:
   The difference of x and y is four less than the sqare of c

9. Translate the equation into a sentence:
   $$2m + n = 5$$

10. Solve for x.

   The Perimeter equals 11.
